FINAL INSTITUTIONAL CONTROLS IMPLEMENTATION PLAN FOR THE FORMER CAMP IBIS, SAN BERNARDINO COUNTY, CALIFORNIA

Dear Ms. Tran:

The Department of Toxic Substances Control (DTSC) has completed its review of the final Institutional Controls Implementation Plan (ICIP), the above-referenced document, dated February 2006 and received on February 10, 2006. The report documented the ICIP to properly address the residual buried munitions and explosives of concern (MEC) at some of the munitions response areas (MRA). This ICIP is applicable to Area C2 and relevant and appropriate to the other MRAs since total (100%) OE absence at these MRAs cannot be guaranteed by the Army Corps at Camp Ibis. DTSC concurs with the final Institutional Controls Implementation Plan.

Additionally, the final ICIP incorporated the five-year recurring review to address the long-term durability, readability, and integrity of the signage, and the repair and maintenance of the signage.

DTSC looks forward to working cooperatively with the Army Corps on the future five-year recurring reviews. If you have any additional questions or comments regarding this transmittal or other project matters, please call Mr. Omo Patrick, Project Manager at (714) 484-5452.

Sincerely,

John E. Scandura, Chief
Office of Military Facilities
Southern California Operations Branch
